

Safe travels for upcoming Memorial Day Weekend

Note Schedule Changes to Residential Trash Pick-Ups for City Holidays:

Memorial Day, Monday, May 30th,
Independence Day, Monday, July 4th and
Labor Day, Monday, September 5th are
Monday pick-ups move to Tuesday,
Tuesday pick-ups move to Wednesday,
Thursday and Friday pick-ups remain unchanged.

Aquatic Complex Season Opening Saturday, May 28th!!!

Pool hours are Tuesday through Sunday 1:00 - 6:00 PM; closed Monday for maintenance,
except will be open Monday, Memorial Day, May 30th and Monday, July 4th!
Pool will be closed Saturday, July 2nd for July Jubilee Festivities.

Adult Swim hours are Tuesday through Sunday 6:00 - 7:00 PM. Daily admission is \$3 per person, and free for children two years and under. Season tickets are \$60 per person and \$35 for each additional family member. 2016 season runs from Saturday, May 28th through Sunday, August 21st. Children 10 years old and under will not be permitted without an adult or a competent person 16 years old and over. Children 11 years old and above will be permitted without an adult, however, they must qualify as an efficient swimmer. For questions or party reservation information call 325-597-2152 ext. 200.

Public Drinking Water Notice

PWS/1540001/CO

The U.S. Environmental Protection Agency (EPA) has set maximum “allowable levels” for certain contaminants in drinking water. These levels are referred to as MCL (Maximum Contaminant Levels). When the Texas Commission on Environmental Quality (TCEQ) notifies the City that our regular water system testing shows that the allowable levels for certain contaminants have exceeded those “allowable limits,” we are required to notify our citizens. This is a mandatory/required quarterly notification regarding contaminate levels of Radium, Gross Alpha, excluding Radon and Uranium in our drinking water for the time frames indicated below.

Mandatory language for Maximum Contaminant Level Violation MCL,

COMBINED RADIUM -226 & RADIUM -228

The Texas Commission of Environmental Quality (TCEQ) has notified the CITY OF BRADY water system that the drinking water being supplied to customers had exceeded the Maximum Contaminant Level (MCL) for COMBINED RADIUM (-226 & -228). The U.S. Environmental Protection Agency (U.S. EPA) has established the MCL for COMBINED RADIUM (-226 & -228) at 5 pico curies per liter (pCi/L), based on a running annual average (RRA), and has determined that it is a health concern at levels above the MCL. Analysis of drinking water in your community for **COMBINED RADIUM (-226 & -228) indicates a compliance value during quarter one of 2016 of 19 pCi/L for EP002, 21 pCi/L for EP003, 39 pCi/L for EP004, 15 pCi/L for EP005, 22 pCi/L for EP006, and 16 pCi/L for EP007.**

This is not an emergency. However, some people who drink water-containing radium -226 and/or -228 in excess of the MCL over many years may have an increased risk of getting cancer.

You do not need to use an alternative water supply. However, if you have health concerns, you may want to talk to your doctor to get more information about how this may affect you.

We are working to correct the problem: The City of Brady has engaged professional engineering services in which probable technical solutions have been derived to reduce radionuclides in the drinking water. The City of Brady expects to return to compliance on or about the year 2020.

Mandatory language for Maximum Contaminant Level Violation MCL, AVERAGE/02/GROSS ALPHA,EXCL. RADON & URANIUM

The Texas Commission of Environmental Quality (TCEQ) has notified the CITY OF BRADY water system that the drinking water being supplied to customers had exceeded the Maximum Contaminant Level (MCL) for gross alpha excluding radon and uranium. The U.S. Environmental Protection Agency (U.S. EPA) has established the MCL for gross alpha excluding radon and uranium at 15 pico curies per liter (pCi/L) based on a running annual average (RAA), and has determined that it is a health concern at levels above the MCL. **Analysis of drinking water in your community for gross alpha excluding radon and uranium indicates a compliance value during quarter one of 2016 of 24 pCi/L for EP002, 28 pCi/L for EP003, 35 pCi/L for EP004, 19 pCi/L for EP005, 25 pCi/L for EP006, and 25 pCi/L for EP007.**

This is not an emergency. Certain minerals are radioactive and may emit a form of radiation known as alpha radiation. Some people who drink water containing alpha emitters in excess of the MCL over many years may have increased risk of getting cancer.

You do not need an alternate water supply. However, if you have health concerns, you may want to talk to your doctor to get more information about how this may affect you.

We are working to correct the problem: The City of Brady has engaged professional engineering services in which probable technical solutions have been derived to reduce radionuclides in the drinking water. The City of Brady expects to return to compliance on or about the year 2020.

If you have any questions regarding these violations, you may contact Gary Jacobson at the City of Brady at 325-597-2244.

Please share all of this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

Public Meetings

City Council Meetings are held the first and third Tuesdays of each month at 6:00pm at the City of Brady Service Center, located at 1405 North Bridge St.

Each meeting includes an opportunity for the public to address the City Council with any issue.
